

Nmap Room (task 3)

By Anson Shaji

Things I learned in this room:

- Tcp scan three way hand shake
- Stealth scan
- UDP scan
- Nmap commands
- How nmap scan and detect open ports
- NSE nmap script engine
- Working with some default scripts
- A hands on session on scanning a target ip
- And finds open ports and using a ftp script to find ftp anonymous login is possible or not!
